Professional Summary

Front End Engineer with 3+ years of experience specializing in high-performance **JavaScript/TypeScript** ecosystems (**Vue 3, React**). Expert in **UI Migration** and architecting **Component-Driven** design systems that scale. Proven track record in optimizing **Core Web Vitals** through bundle analysis and lazy-loading, and implementing secure, robust authentication flows. Experienced in bridging complex backend **RESTful APIs** and **CMS (SiteCore)** integrations with intuitive, accessible user interfaces.

Technical Skills

Languages: TypeScript, JavaScript (ES6+), HTML5, CSS3/SCSS

Frontend Technologies: Vue 3 (**Composition API**), React.js, Nuxt.js, Pinia, Vuex, Redux Toolkit, Material UI (MUI), Tailwind CSS

Performance & Tooling: Vite, Webpack, **Bundle Analysis**, Service Workers, Lazy Loading, Tree-shaking, i18n

Testing & Security: Vitest, Jest, Unit Testing, **CASA Security Certification**, RSA/AES Encryption, SAST/DAST

Backend & CMS: Node.js, .NET, ASP .NET Core, **SiteCore CMS**, RESTful APIs, GraphQL, SQL Server, Docker, AWS S3

Professional Experience

Covalience India Pvt. Ltd

Front End Engineer

Chandigarh

Jan 2023 – Present

- **Enterprise UI Migration:** Spearheaded the migration of a legacy financial suite from **ASP.NET MVC** to a reactive **Vue 2/3** architecture; established a **component-driven mindset** by building a shared UI library, reducing development time for new features by 40%.
- **CMS-Driven Training Platform:** Designed and developed a global Training Platform tightly integrated with **SiteCore CMS**; implemented a robust **i18n translation** framework to support multi-language content delivery across diverse regions.
- **Performance Optimization:** Improved **LCP (Largest Contentful Paint)** by 35% through rigorous **bundle analysis**, implementing route-based lazy loading, and optimizing asset delivery pipelines via Vite.
- **Backend & API Engineering:** Developed high-performance **RESTful APIs** and facilitated seamless **third-party API integrations**, ensuring low-latency data flow between enterprise backend systems and the UI.
- **Secure Authentication:** Engineered a **robust login integration** and secure dashboard that achieved **Google App Defense Alliance (CASA)** certification; utilized RSA encryption for sensitive data handling.
- **Advanced PWA Integration:** Integrated **Service Workers** for background sync and offline capabilities in a Vue/Pinia application, enhancing user retention on unstable connections.
- **Quality Assurance:** Introduced **Unit Testing** using Vitest/Jest for critical business logic, increasing code coverage and reducing production UI bugs.

Key Projects

Full-Stack Video Streaming Platform

Tech Stack: React.js, TypeScript, Tailwind CSS, AWS S3, FFmpeg

Personal Project

- Developed a type-safe streaming dashboard supporting file uploads; optimized UI performance using **Web Workers** to prevent main-thread blocking during heavy data processing.
- Implemented a custom video player with HLS support, ensuring a seamless playback experience across different network speeds.

Education

Doaba Institute Of Engineering & Technology

B.Tech in Computer Science & Engineering

CGPA: 7.6/10 – Focused on Modern Web Architecture and Data Structures.

Punjab

2019 – 2023
