Professional Summary

Software Engineer with 3.5+ years of experience specializing in the **.NET** ecosystem and full-stack web development. Expert in architecting scalable **REST APIs** and enterprise-grade applications using **.NET 8, ASP.NET Core**, and **C#**. Proficient in modernizing legacy architectures and building high-performance frontends with **Vue.js** and **React.js**. Strong background in **SQL Server** optimization (Stored Procedures, Performance Tuning), security best practices (**SAST/DAST**), and cloud integrations. Adept at translating complex business requirements into robust, maintainable software solutions while maintaining a focus on engineering excellence and clean code.

Technical Skills

Languages: C#, SQL (T-SQL), TypeScript, JavaScript (ES6+), C++, HTML5, CSS3

Backend & Frameworks: **.NET 8 / Core / 4.8**, ASP.NET Web API, ASP.NET MVC, Node.js, Express, NestJS, OWIN, SiteCore, Solr

Frontend Development: **Vue 3 (Pinia)**, React.js (Hooks/Context), Redux Toolkit, Tailwind CSS, Service Workers

Databases & Caching: **SQL Server (Advanced SPs, Views, Functions)**, PostgreSQL, MongoDB, Redis

Enterprise Integrations: **Celigo (Data Pipelines)**, Oracle NetSuite, ActiveReports .NET, RESTful Microservices

Cloud, DevOps & Tools: AWS (S3/CloudFront), Docker, Nginx, **Azure DevOps**, Git, Linux (Fedora/Ubuntu), Postman

Security & Architecture: SAST/DAST Tools, **Google CASA Compliance**, RSA/AES Encryption, OAuth2, Core Web Vitals Optimization

Professional Experience

Covalience India Pvt. Ltd

Application Engineer (Full Stack)

Chandigarh

Jan 2023 – Present

- **Legacy Modernization & Automation:** Spearheaded the migration of a mission-critical Financial Planning tool from **legacy ASP.NET MVC** to a modern **Vue 2** and **.NET Framework 4.8 Web API** stack, eliminating manual document workflows and digitizing the submission process.
- **Security & Compliance Architecture:** Achieved **Google CASA** certification by executing **SAST & DAST** vulnerability scans and remediation; implemented **RSA & AES** encryption/decryption algorithms for secure transmission of sensitive user data.
- **Enterprise .NET 8 & Search Integration:** Engineered a scalable application using **Vue 3, .NET 8, SiteCore, and Solr**; integrated **Pinia** for state management and **Service Workers** for high-efficiency background data synchronization.
- **Database Engineering & Pipelines:** Optimized **SQL Server** performance by refactoring complex Stored Procedures, Views, and Functions; built robust data pipelines using **Celigo Flows** to synchronize business data between SQL Server and **NetSuite**.
- **High-Performance Media API:** Developed a native-speed conversion API for **HEIC/HEIF to JPG** by leveraging **.NET Native/COM** and a custom **C dynamic library**, significantly improving web compatibility and processing speed.
- **Reporting & Auth Systems:** Built a dynamic reporting engine using **ActiveReports .NET** for automated PDF/Excel generation; architected a secure **OAuth2** refresh token framework using custom **OWIN middleware**.
- **Frontend Optimization:** Boosted application performance by analyzing build bundles and enforcing advanced compression strategies, leading to a significant improvement in initial page load times.

Key Projects

Video Streaming Platform

Personal Project

Tech Stack: React.js, NestJS, TypeScript, AWS S3, PostgreSQL

- Architected a video streaming platform leveraging **AWS S3 multipart uploads** for files 1GB+, ensuring 99.9% upload reliability.
- Developed a scalable **RESTful API** to manage complex metadata and secure content delivery via presigned URLs.

Education

Doaba Institute Of Engineering & Technology

B.Tech in Computer Science & Engineering

CGPA: 7.6/10 – Specialized coursework in Data Structures & Algorithms, DBMS (SQL) and Operating Systems.

Punjab

2019 – 2023
