Professional Summary

Frontend Engineer with 3.5+ years of experience specializing in **JavaScript/TypeScript** ecosystems and modern reactive frameworks (**Vue 3, React**). Proven track record in leading large-scale architectural migrations from legacy systems to high-performance **Micro-frontends**. Expert in optimizing **Core Web Vitals**, engineering secure UI components (**Google CASA/SAST**), and implementing complex state management patterns with **Pinia** and **Redux**. Strong full-stack foundation with the ability to bridge the gap between complex **RESTful APIs** and intuitive, accessible user experiences.

Technical Skills

Core Frontend: TypeScript, JavaScript (ES6+), **Vue 3 (Composition API)**, React.js, HTML5, CSS3/SCSS
State & Logic: Pinia, Redux Toolkit, Context API, Service Workers, RxJS
Build & Performance: Vite, Webpack, Bundle Analysis, Tree-shaking, Image Optimization, Compression Strategies
UI & UX: Tailwind CSS, Bootstrap, Component-Driven Development, Accessibility (WCAG), Responsive Design
Security & Testing: SAST/DAST, Google CASA, RSA/AES Encryption, Unit Testing (Vitest/Jest)
Full-Stack Context: Node.js, ASP.NET Web API (C#), **SQL Server**, AWS (S3), Docker, Azure DevOps, Git

Professional Experience

Covalience India Pvt. Ltd

Senior Frontend Engineer (Vue/React)

Chandigarh

Jan 2023 – Present

- Modern UI Transformation:** Spearheaded the end-to-end migration of a legacy financial suite from **ASP.NET MVC** to a reactive **Vue 2/3** architecture; architected reusable component libraries that reduced redundant code by 50%.
- Security-First Engineering:** Engineered a secure dashboard that achieved **Google CASA certification**; implemented **RSA/AES encryption** for frontend-to-backend data transmission and led remediation of XSS/CSRF vulnerabilities identified via **SAST/DAST**.
- Enterprise Application Design:** Developed a high-performance web app using **Vue 3, Pinia, and SiteCore**; implemented **Service Workers** for background data synchronization and offline capability, improving user retention by 20%.
- Frontend Performance Optimization:** Achieved a 35% improvement in **LCP (Largest Contentful Paint)** by enforcing bundle splitting, lazy-loading strategies, and advanced asset compression via Vite build-tooling.
- Search & Discovery Integration:** Integrated **Solr** search with custom Vue components to provide real-time, high-speed filtering and search functionality across large enterprise datasets.
- Mentorship & Best Practices:** Established frontend coding standards, led code reviews for a team of 4, and introduced **TypeScript** into the workflow to reduce runtime errors and enhance developer experience (DX).
- Full-Stack Collaboration:** Collaborated with backend teams to design optimized **RESTful contracts** and debugged complex **SQL Server** stored procedures to ensure seamless data flow to the UI.

Key Projects

High-Performance Video Streaming Platform

Personal Project

Tech Stack: React.js, TypeScript, Tailwind CSS, AWS S3

- Built a responsive, type-safe streaming dashboard featuring custom video players and multi-part upload progress tracking.
- Optimized UI responsiveness for 1GB+ file uploads using **Web Workers** to offload heavy computations from the main thread.

Education

Doaba Institute Of Engineering & Technology

B.Tech in Computer Science & Engineering

CGPA: 7.6/10 – Specialized in **Data Structures** and **Modern Web Architecture**.

Punjab

2019 – 2023
